The 8 Extraordinary Meridians are the Creators of the 12 Ordinary Meridians

The 8 extraordinary meridians affect the 12 ordinary meridians, and not the other way around. The 8 are the creators of the 12. Yet, when the 12 are blocked by emotions, then the 8 extraordinary channels are inactive, and we are unable to refine our experience of life and unable to fertilize our dreams--we are then locked into the repetitive cycles of linear change in a life of struggle and disappointment.

The 12 OMs are the rivers of our life that we journey upon. The Lemurian angels have described them as the "rivers of filth" due to the polluting emotions and memories that bind us to decay. They have acted as gatekeepers of the matrix, binding us to illusion through holding memory as pollutants that seep into the moment unfolding. Yet when they clear and the 8 extraordinaries activate and flow into them perpetual resources from the reservoirs of Source, life becomes magical.

When we have mastered life in the vertical beyond the mirrors and so are living the 12 god/goddess archetypes, the 13th activates and together the portal of the High Heart opens. It is then that the powers of the 8 EMs can start to flow through the 12 OMs. The 12 and 8 then begin to operate as a unified field, and together, they form a 'womb as a field of manifestation through hormonal messages'¹—that becomes the new way in which we manifest.

The 12 and 8 operate as one...and the 20 god and goddess archetype pairs activate as powers of our evolved awareness that translate into pheromonal secretions...all this we are unfolding through the power of the runes that fill in the gaps in our bodies...

With pheromones, you no longer need search for Infinite Intent because life automatically manifest Infinite's will through the pheromones. You will feel it in you and see it around you—it is automatic—you do not *will* pheromones to be secreted. It happens through refinement of awareness, perspective, and attitude. This is why we steep in lofty tones and insights: because they bring refinement. Refinement brings self-appreciation and appreciation of life, and this causes ignition of higher faculties and greater power.²..

An angel pointed out at the Shamanic Retreat (2014) that innocence is not harmlessness....Innocence needs ***wisdom of the moment applied***—and that is where the 12 tones of harmlessness come in...We need innocence to access true sexual power, yet we need the wisdom of the moment applied, which happens through being completely harmless. ***Divine Compassion*** is the deepest level of wisdom of the moment applied that is steeped in the understanding that there is only one relationship, and that is the one with the source of our

existence. When you know you are All and all is within, you become incorruptible.

It is then that ³

1. The cell metamorphoses – nucleus enlarges, and memory held between nucleus and membrane erases and cell membrane thins..so the Infinite Intent as communicated to the enlarged cell is transmitted to environment. You become a conduit of communication of Infinite Intent to the body and the environment.

Body then is under the agency of Inf Intent rather than under the tyranny of mind and the heart that are at war with one another. That accelerates body healing, and clears the organs distorted frequencies...enabling you to express a real environment.

2. Neutrinos are produced, which heal broken building blocks – that are the result of the distortions of the directions and their mirrors. Each subpersonality of the old cosmos relates to a building block that has been split. Neutrinos heal this...and when all blocks are healed...their higher expression becomes part of unified field.
3. We manifest from a field of Intent rather than from clustering building blocks.

“12 meridians are purifying rivers of body, soul, and spirit, and through harmlessness we heal the phases of linear change and they become tools of immortality, incorruptibility and regeneration.”

When the 12 carry out the song of harmlessness from the 8 EMs, then a womb is formed that is a field of manifestation that is translated as higher hormonal messages.

These higher hormones are the pheromones that have all the elements of White Magic of the Mother: *coding, scent, and tone.*

Pheromones and our sexual power are connected. The 12 OMs flow our sexual power...they receive the song of fertility from the 8 EMs, and they manifest from sexual power.

Almine has described our sexuality as being *“the celebration of self, the constant awareness of the potency of our being that exudes as the sun does its light or the rose does its fragrance.”*

Of the human hormones, she has said, *“old hormones (when gap of cause and effect) create chains that stick to one another..that is what programs do...and manifest as boundaries and*

structures. Pheromones are beyond polarity and so beyond the atomic level of building blocks.

We've thought of hormones as driving our sexual evolution through life (puberty, childbearing, menopause...) but really that is the 'tail wagging the dog'. The higher hormones drive our 'sexual evolution' or power to manifest...and it evolves the vehicle of embodiment and the greater body of the environment in tandem. We lift up all realms as we evolve through sexual potency. The pheromone is the orgasmic ignition of beholder and beheld in recognition...it is the byproduct of this.....it only happens in the paradox...which only happens in profound humility, where you become the gateway of the unfathomable.
